

BC ASSESSMENT

BC Assessment Property Update Notification

October 2015

BC Assessment places great value in the accuracy and reliability of our property information as well as the importance of having current, up-to-date property data.

In order to confirm and update property data for residential properties, BC Assessment will be using aerial and street front imagery that we obtained in 2015 as part of our property review process.

Any updates to property assessments as a result of this review will be reflected on property owners' 2017 Assessment Notices. Please note that updates are completely taken care of by BC Assessment and no action is required by property owners.

This review & update process has previously been successfully used in several communities and regions throughout British Columbia.

For more information, please contact BC Assessment at 1-866 valueBC.

The communities that will be updated for 2017 include:

Lower Mainland / Sunshine Coast	Vancouver Island	Northern BC	Southern BC
